DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8, 12-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mathieus.

The statement of intended use carries no patentable weight.

Mathieus discloses a high pressure water jet surface cutting device comprising: a high pressure water jet nozzle head 33 with a plurality of high pressure water jet nozzles 49, wherein at least one or more nozzles being arranged at an inclined angles with respect to perpendicular position A (see figure 4), the jet nozzles also are arranged at least two or more circumferential positions with different distances d1-d4 from the rotation center A (see figure 3), and the jet nozzles further are arranged at a plurality of circumferential positions with differ in inclined angle (see column 6, lines 54+).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

4. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mathieus.

Mathieus teaches all the limitations of the claims except for method of cutting the composite mold article. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to utilize the device of Mathieus for cutting the composite mold article, because Application has not disclosed that the cutting the composite mold article with the claimed device provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's method of cutting the composite mold article to perform equally well with either claimed device or the Mathieus device. Therefore, it would have been an obvious matter of design choice to modify the device of Mathieus to obtain the invention as specified in claims 9-11.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a high pressure water jet: Mahyera et al., Bennett, Knudson et al., Kiess, and Rajewski.
